Paper-2	Syllabus	Number of questions
<p>Total Duration 2 hours</p> <p>Total number of questions – 100</p> <p>Maximum marks- 400</p>	<p>a) <b><u>Logical &amp; Analytical Reasoning</u></b>                       Statements &amp; Conclusions, Number and Sequencing, Missing number, Pattern Completion, Order and Ranking, Direction and Distances, Puzzles, Calendars, Relationship Problems, Coding &amp; De-coding, Verbal Reasoning, Non-Verbal Reasoning &amp; Legal Reasoning.</p>	50
	<p>b) <b><u>Digital Literacy &amp; Computer Awareness</u></b>                       Fundamentals of Computers, E-mail Communication Basics, Computer Hardware, MS Office (Word, Excel &amp; Power Point), Internet &amp; Worldwide web, Social Media Platforms, Web Search engines, Mobile Phones (basic conceptual knowledge).</p>	30

	<p><b>c) <u>English Language</u></b></p> <p>English Language skills, including Sentence Completion and Structuring, Error Detection, Vocabulary (Synonyms/Antonyms, One Word Substitution, etc.), Reading Comprehension/Passage, Translation from Punjabi to English, Precis Skills, Fill in the blanks.</p>	<p><b>20</b></p>
--	--	------------------

**Note 1:** Computer Based Test/Examination is a format for the Written Test, where the candidates would be required to attempt the question papers on a computer. Therefore, the participating candidates should note that the examination would be conducted on different dates for different sets of candidates.

**Note 2:** Each candidate shall be issued an Admit Card indicating the specific date, time and venue for candidate's computer based tests. The candidate is required to download the Admit Card and bring a hard copy (printout) of the same, alongwith a prescribed Photo Identity Proof (Indian Driving License, PAN Card, Voter Identity Card, Indian Passport, Adhar Card), for entry to the venue of the Computer Based Test.

**7.1 Negative Marking**

Negative marking for incorrect answer shall be to the tune of 25% of the marks assigned to a question i.e. 1 mark.

**7.2 Normalization**

As computer based tests would be conducted on different dates, with different sets of questions, for different sets of participants, normalization of scores shall be carried out using the Mean Standard Deviation method using the following formula

Normalization mark of  $j^{\text{th}}$  candidate in the  $i^{\text{th}}$  Shift  $\widehat{M}_{ij}$  is given by

$$\widehat{M}_{ij} = \frac{\bar{M}_t^g - M_q^g}{\bar{M}_{ti} - M_{iq}} (M_{ij} - M_{iq}) + M_q^{gm}$$

$M_{ij}$  = is the actual marks obtained by the  $j^{\text{th}}$  candidate in  $i^{\text{th}}$  shift.

$\bar{M}_t^g$  = is the average marks of the top 0.1% of the candidates considering all shifts (number of candidates will be rounded-up).

$M_q^{gm}$  = is the sum of mean and standard deviation marks of the candidates in the paper considering all shifts.

$\bar{M}_{ti}$  = is the average marks of the top 0.1% of the candidates in the  $i^{\text{th}}$  shift (number of candidates will be rounded-up).

$M_{iq}$  = is the sum of mean marks and standard deviation of the  $i^{\text{th}}$  shift
